

External Timber Bi-Fold Systems

Victorian Ash Hardwood and Premium Quality Hardware

Built to enjoy. Built to last.

Our external timber bi-fold systems are constructed from the very best select-grade Victorian Ash Hardwood - not softwood, like Cedar or Meranti.

This provides the best defence against the harsh Australian climate and ensures your bi-fold works beautifully, regardless of the conditions.

Our unique track installation method, extra thick laminated glass and premium quality hardware adds up the best bi-fold system you can buy - at a price that makes everything else look inferior.

“The results speak for themselves.”
